

Product Data Sheet

ArcSafe® Toric AmpShield™ Arc Flash Face Shield

The ArcSafe® Toric AmpShield™ Arc Flash Face Shield combines a highly transparent, grey nearly clear HT™ nanoparticle polycarbonate face shield with a Toric shape that allows for wide peripheral view, excellent downward vision and reduced internal glare. An integrated transparent chin protector provides protection from hazards from below, such as debris and splash. The Patented ArcVent™ system enhances ventilation and the weight compensating slotted cap bracket reduces the weight imbalance felt while above the head in the stowed position.

Features

- Toric shape allows for wide peripheral view, excellent downward vision and reduced internal glare
- Highly transparent, grey nearly clear HT™ nanoparticle polycarbonate lens provides enhanced visibility and heightened colour recognition.
- Weight compensating slotted cap bracket (to suit MSA V-Gard hard hat only) which reduces the weight imbalance felt while above the head in the stowed position. The adjustable slotted adaptor allows workers to comfortably adjust the position of the face shield when not in use or exposed to risk.
- The integrated transparent chin protector provides protection from hazards from below, such as debris and splash. Includes Patented ArcVent™ ventilation system.
- LeverLock® attachment system for easy shield replacement. Press to release slotted adaptors for easy bracket removal.
- Ability to add optional Streamlight® flashlight on either side of the face shield. (sold separately)
- Weight: 362g (13.0oz)

Certifications and Standards

- PPE Cat Level 2 Protection
- 15 cal/cm2 ATPV
- NFPA 70E, ASTM F2178, ANSI Z87.1+S,
ISO 16321-1 (successor to EN 166), IEC 62819

OPTION: The ArcSafe® Streamlight® Flashlight is designed to provide high intensity illumination in low light areas or when working up close. Designed to be used with our ArcSafe® AmpShield™ Arc Flash Face Shield.
